### Retail initiative in G-sec in Demat

Two primary dealers, PNB Gilts Limited and IDBI Capital Market Services Ltd. have taken a lead in retailing of Government securities in demat form. Investors can buy government securities even in small value of Rs. 25,000/- in demat form.

### NSDL enhances the security of messages transmitted between NSDL and Business Partners using 'Dongle'

Dongle is a hardware based encryption device, which enhances the security of messages transmitted between NSDL and Business Partners. This device is specific to the business partner and is not interchangeable. After installation of the Dongle, message transmission security has been strengthened further.

### NSDL plans to launch a software to enable DP branches to be online connected to the main office

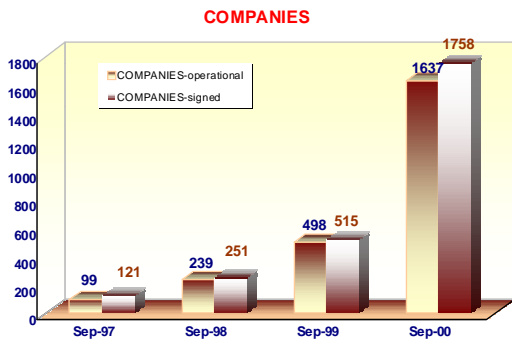

NSDL will soon launch its software facility to enable the branch of a depository participant to make enquiries from the main system of the depository participant. The depository participant can use its own network for this purpose.

NEWEST UPDATE

## Performance Summary

### Companies:

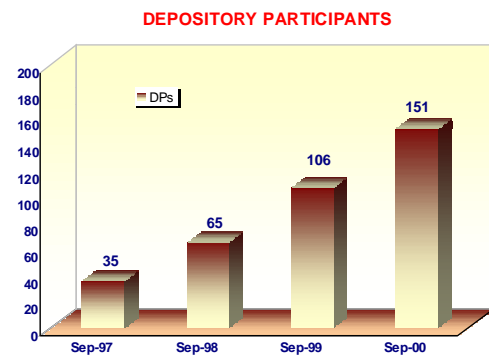

As on September 30, 2000, 1758 companies have signed agreements with NSDL. Out of these, demat facilities are available for securities of 1637 companies.

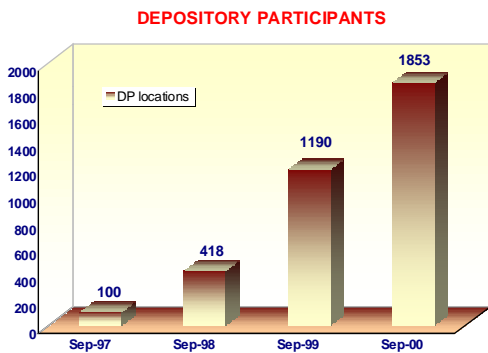

INDEX	TOTAL SCRIPS	JOINED NSDL
S&P CNX NIFTY	50	50

## Topic of Interest

### Speed-e

Speed-e is an internet based service planned to be provided by NSDL. Any client desirous of availing this service can do so, if its DP subscribes to SPEED-e. The client is required to submit a paper application to the DP. DP will register the client after ascertaining the identity of the client. Investors will have two choices. As a low end user, the client would have a password and securities can be transferred from its account to only predetermined clearing member accounts upto a maximum of three. As a high end user the client would have to use a smart card. The client can then give delivery instructions to the DP on the internet. Hence, paper instructions need not be given. The DP of the client will collect the instruction from the internet and would execute the same in its depository system. DP would also update the status of the instructions on the internet, which can be viewed by the client.

## NSDL Calendar of Events
